The art style is nice and unique but the gameplay is poor and boring.

100 monster spawns and you die after a certain level

Guns are energy not ammo related. For example one shotgun shot reduce the upper middle bar by 10% Therefore if there are hundreds of enemies you die.

Also i can glitch the game putting myself next to a corner of a wall and enemies stand there shooting but i get no damage then i can take them down one by one.

Only one type of enemy.
